Data analyst assignment

This assignment is to test your SQL skills. Below are a set of questions along with a table structure attached which you can refer to while writing the queries.
Here's a brief explanation these tables -
Campaigns - Contains list of fundraisers with their names , goal amount , start date , source from which they were created, id and project id.
Projects - Project is a set of campaigns for a specific cause , project can have multiple campaigns, and the category to which it belongs.
Payments - This has all the donations along with the date, currency , amount and status of payment [if ot was completed or failed]
Withdrawals - This has a list of entries where money is withdrwan from the project/campaign.

These are dummy values and might not have a correlation.

Questions -

1. List of campaigns where the pending amount is greater than 1k , Submitted in this year , sorted with highest pending amount.
2. Project wise withdrawal ,show currency wise raised and transferred
3. % of withdrawals happened from APP
4. This year total amount that was requested and total amount that got transferred [all in inr equivalent]
